Subject: Monitoring

All,

We got the monitoring baseline data completed on 5/25. By the time we finished, we were doing four plots per day. We won't go out again until this time next year.

I want to thank Dana and her friend Greg for their hard work. They and myself were out every day until we were finished.

On Saturday we had Laurie Hammel, Jeff Whilden and Luke Shafer out for the day. On Sunday, it was just Laurie. She also was out on Monday morning. Tuesday we had Sandy O. and Jane Yazzie. On Wednesday we had Cindy Crowe from BLM. She is a new seasonal employee and did she kick butt!

Thanks to all who came out. Dana is now compiling the data. Hopefully, we will have more folks for next year. Four more people and we can cut the time in half.

Thanks to all that came out and got sunburned!!

Rick
